The English content for the “E-Learning Users Guide” ...

As you can see, we have English “labels” for most functions but not the contexts. This is the major difficulty this EL system needs to overcome (or could never be overcome...)

Outline

- Log into the system as a student, change the interface as English, and maneuver around.
- Log into the system as an instructor (who is running a course for this semester).
 - Change the interface into English if needed. Add yourself into the course as a TA.
 - Change back to default interface for the instructor (if needed).
- Log into the system as yourself and check if needed operations can be done (those privileges an instructor has).

“Needed” operations

- Post a note (to make announcement).
- Assign a homework.
- Grade submitted homework.
- Create course syllabus (aka “Learning Path”) (including uploading course PPT, etc.).
- Giving online quiz or test/exam.
- Log students exam scores.

hands
on

The logo features the words "hands on" in a black serif font. The word "hands" is positioned above "on". The text is centered between two blue handprints. The handprint on the left is a palm print, and the handprint on the right is a full handprint with fingers spread. The background is white.
